

AUTO
fresh
air dispenser

Specially designed AUTOFRESH™ Air Dispenser incorporates a single or double D-cell battery-operated micro-motor fan system. With continuous operation or variable intermittent ON/OFF controller and automatic light sensor switch that silently circulates the natural fragrances throughout the room. This feature extends the optimum service of each 40ml. sachet refill that last at least 60 days for most usage situations

Ideal for home use especially in bedrooms, bathrooms and sitting rooms. Likewise for commercial applications at reception areas, hallways, washrooms and guests room in the hotel, restaurants, healthcare centres, sports clubs and wherever a clean and natural refreshing environment is desired.
